

Dynamic Triage Assessment

Autonomous Forensic Report

PIPELINE	Automated Triage Pipeline
CASE ID	rocba-cdrive
PREPARED BY	Autonomous DFIR Agent
REPORT DATE	2026-06-15 UTC

01 Executive Summary

Evidence indicates coordinated malicious activity by Actor fred.rocba@outlook.com targeting user accounts fredr and srl-h. The presence of SDelete (anti-forensic utility), multiple staging archives (StarFury.zip), and significant Recycle Bin activity (I/R files) indicates deliberate evidence wiping and data staging. Execution is supported by SDelete.lnk in the Recent folder and Recycle Bin metadata, contradicting the previous unverified status.

Null Hypothesis Evaluation: The presence of SDelete and multiple staging archives in the Temp directory is inconsistent with standard software installation or cleanup, rendering the benign hypothesis unsupported by the evidence.

Candidate MITRE ATT&CK Techniques: T1070, T1074

EXTRACTED FINDINGS

02 Attack Sequence & Timeline

- Step 1:** Actor downloaded SDelete utility and staged archives to user directories. T1074 (Conf: High)
- Step 2:** Evidence indicates execution of suspicious batch script and executables in user temp directory. T1059 (Conf: Medium)
- Step 3:** Evidence indicates deletion of multiple executables, likely an attempt to remove forensic artifacts. T1070 (Conf: High)

03 System Profile & Evidence Scope

Analysis Tooling	Autonomous MCP Framework

Risk Scoring Methodology: Scores (0-100) are heuristically generated based on artifact type, presence of obfuscation, and intersection with known ATT&CK vectors. 0-20: Benign/Admin Baseline | 21-60: Suspicious/Dual-Use | 61-100: Actionable/Malicious.

SDelete Tool (Actor: fred.rocba@outlook.com)Risk:
80/100HIGH
PRIORITY**Value/Path:** Users/fredr/Downloads/SDelete.zip**Observation:** SDelete utility found in user downloads folder; evidence of execution via SDelete.lnk.**Validation:** Examine Prefetch and Shimcache for execution evidence.
